

SKYWAY Best-of-Breed Solutions

van Thiel ERREM Tube-Lock® concept

SUPERIOR BENEFITS

- Suits every form of building and height due to the unique smooth tube connection
- Cost-saving and fast, simple erection, and dismantling can be carried out by one person
- No maintenance
- Only 6 parts
- Heaviest part weighs only 15.7 kg
- Staggering Tube-Lock® is unnecessary
- Guarantees a stable scaffold
- Great logistic advantages on the building site, in the depot and with transport
- Used tubes as well as new tubes can be used, which upgrades the existing material
- Tube-Lock® concept and the traditional scaffold are 100% interchangeable
- In combination with the hop up bracket, bricks can be laid between the wall and the inner standard in an ergonomic manner conforming to the regulations

Tube-Lock® concept is designed for constructing brickwork and independent tied scaffolds and suitable for use in the shipbuilding, aviation and industrial sectors.

Tube-Lock® concept enables you to build a flexible, safe scaffold consisting of light components because of the combination of flexibility, simplicity, strength and fast erection and dismantling.

Safety, Quality, Innovation and Flexibility

P-number	Product Description	Weight KG
1500.100	Tube-Lock® + 1 metre tube	4,60
1500.150	Tube-Lock® + 1,5 metre tube	6,40
1500.200	Tube-Lock® + 2 metre tube	8,50
1500.300	Tube-Lock® + 3 metre tube	12,00
1500.400	Tube-Lock® + 4 metre tube	15,60

If Skyway assembles the Tube-Lock® in a used tube supplied by you, this includes cutting, alignment and cleaning of the tube.

P-number	Product Description	Ø	Weight KG
1057.000	ERREM right-angle coupler, fixed wedge	48-48	1,50
1126.000	ERREM swivel coupler, fixed wedge	48-48	1,70
1079.000	Stampwerk right-angle coupler, loose wedge	48-48	0,80
1082.000	Stampwerk right-angle coupler, fixed wedge	48-48	1,10
1080.000	Stampwerk swivel coupler, loose wedge	48-48	0,80
1083.000	Stampwerk swivel coupler, fixed wedge	48-48	1,10

P-number	Product Description	Ø	Weight KG
1521.000	Foot lift transom, Stampwerk fixed wedge	48	7,40

If Skyway assembles the couplers on a used tube supplied by you, this includes cutting, alignment and cleaning of the tube.

P-number	Product Description	Ø	Weight KG
1620.000	System transform, 5+3 board extender Stampwerk fixed wedge	48	9,20

If Skyway assembles the couplers and extender on a used tube supplied by you, this includes cutting, alignment and cleaning of the tube.

P-number	Product Description	Weight KG
1038.000	Base plate with thin pin which fits in the Tube-Lock® tube	1,25

P-number	Product Description	Length	Weight KG
1728.300	Steel scaffold ladder	3	18,50
1728.400	Steel scaffold ladder	4	24,00
1727.400	Aluminium scaffold ladder	4	10,00

Tube-Lock® is a registered trademark of van Thiel United

The multifunctional Tube-Lock® concept scaffold consists of 6 light parts:

1. Tube-Lock® standards, ledgers and guardrails

The Tube-Lock® assembled in the ends of the tube ensures a strong connection of the tubes lengthwise (the working length of the tubes is approx. 5cm longer).

2. ERREM and Stampwerk right-angle couplers and swivel couplers

Join standards, ledgers and guardrails in an efficient manner.

3. Foot lift transoms

Simplify assembly because the standards are placed at the correct distance from each other.

4. System transoms

Join ledgers under the work floor, so that a safe and strong floor is created. It is possible to assemble 1,2 or 3 scaffold boards, thanks to the extender provided, between the inside standard and building, creating a safe, strong and level work floor.

5. Base plate

With thin pin suitable for Tube-Lock®

6. Ladder
